

# Community Action Nepal Project Locations

## Project Details

District	Community	Sector	Activity
<b>Makalu Barun National Park</b>	Walung village	Construction	CAN built the Health Post, the Gompa and installed pipes [three kilometres] for clean water.
		Cultural Benefits	CAN financed and oversaw the building of the large Gompa and its on-going maintenance
		Education	CAN runs adult education classes in the Gompa and supports the Mother's Group
		Health	CAN funds two nurses, a helper, provides the medicines, instruments/equipment and first aid training
		Income Generation	CAN supported the community to develop a telephone service based in the Health Post which is now generating a steady income to help sustain CAN village infrastructure
<b>Dhankuta</b>	Bodhe village	Construction	CAN constructed the two storey Shree Bajramai Lower Secondary School.
		Education	CAN funds one science teacher and has provided science equipment
<b>Lower Solu-Khumbu</b>	Ghunsa village	Construction	CAN built the school and toilets and is now about to build two additional class rooms. CAN purchased the school land and land for the kitchen garden and provided the school water supply. CAN has begun a new Health Post building with the cutting and drying of timber. These were CAN's first projects built in 1995/6
		Education	CAN funds six teachers, stationery, teaching material and library books. It financed the raising of the school status to secondary level. CAN also funds two nursery teachers and a nursery classroom
		Health	CAN funds two nurses, one helper, medicines and equipment. CAN also promotes health education, first aid training and provides worming treatment. In 2008 a Health Camp was run during which 1297 patients were seen over three days.
		Income Generation	CAN has provided support for training in kitchen garden development and fruit cultivation. It has also supported 'lead farmer' training and a 'group formation and mobilisation' programme.
<b>Lower Solu-Khumbu</b>	Lapcha village	Construction	CAN built the Upper Primary School and nursery class-room
		Education	CAN funds two teachers, teaching materials and stationery. It financed the building of the nursery school and funds two nursery teachers
		Health	CAN nurses from Ghunsa provide a health education and a worming programme
<b>Okhaldhunga</b>	Bhushinga	Construction	Clean water project with the local people contributing 50% of the total costs

District	Community	Sector	Activity
<b>Khumbu</b>	Machhermo village	Construction	Porter Shelter and Rescue Post opened in October 2006
	Gorak Shep village	Construction	Porter Shelter due to open in October 2008
	Gokyo village	Construction	Planned Porter Shelter building to commence after Gorak Shep is complete [2009]
<b>Sindupolchowk</b>	Bahrabise School for the Deaf	Construction	CAN built the large modern school, the toilets and installed the water supply. This has been CAN's most expensive school project to-date.
		Education	This has become a regional school for deaf children. CAN funds one full time and two part-time teachers, the stationery, teaching materials, has provided additional quilts for dormitories and sports equipment. CAN has also provided the school with four new computers and a colour printer enabling the children to access the internet. Vocational training includes agricultural management on the school's own land.
		Health	CAN nurses visit to provide first aid training, health materials and medicines. The Social Welfare Council has recently observed that the children now regard the school as home.
		Income generation	CAN purchased additional adjoining land for cultivation by staff and pupils. They now produce bananas, coffee, pineapples, mushrooms, potatoes and many other vegetables. There is now sufficient basic food for the school and a surplus which is sold locally to provide additional income for school funds
<b>Nuwakot [Helambu]</b>	Kutumsang village	Construction	CAN has built the Health Post, put in a water supply and built two new class rooms at the Himalayan School. A new roof and other work has been completed at the Birendra School
		Cultural Benefits	CAN has made a donation to the Gompa restoration programme
		Education	CAN supports two schools in this area; the Himalayan School with teaching materials and library books; the Birendra School with library books and teaching materials. CAN built the sanitation block at Kakani School
		Health	CAN built the Health Post, financially supports two nurses, a helper, provided equipment and medicines. A health camp is being arranged for December 2008. The nurses provide health education to three local schools and also a worming programmes and first aid training.
		Income Generation	The CAN Community Motivator has provided kitchen garden support, fruit cultivation and 'lead farmer' training. The Mother's Group have also received group formation and mobilisation training

District	Community	Sector	Activity
<b>Sindupolchowk [Helambu]</b>	Melamchigaun village	Construction	CAN built the secondary school. It also provided the roof for the community funded Health Clinic and improved the water supply. CAN is now in the process of building the school Hostel
		Health	CAN operates a local Health Clinic run by the nurses based at the Milarepa Health Post. It also provides health education, a worming programme and first aid training. It has been agreed to base a nurse permanently at Melamchigaun from September 2008
		Income Generation	CAN has helped extend the kitchen garden, developed fruit cultivation, goat raising and vegetable cultivation programmes. It has also provided the community with group formation and mobilisation support
		Education	CAN funds two teachers, teaching materials, musical instruments, training in the use of these instruments and library books
		Cultural Benefits	CAN supported the purchase of cultural musical instruments and training for the school. CAN has also help refurbish the Gompa and also the Community Centre the nearby Nukote village
<b>Sindupolchowk [Helambu]</b>	Milarepa village	Construction	CAN built the Health Post. CAN also repainted the Milarepa rock carvings. CAN funded the construction of a fish-farm which was recently washed away in a monsoon flood so violent it also took out two government bridges, part of the school and three houses. Thankfully no-one was injured in the incident.
		Health	CAN funds two nurses and a helper at the Health Post. In 2005 it ran a health camp at Milarepa where 550 patients were seen
		Income Generation	CAN has supported kitchen garden development, fruit cultivation, and soil testing programme. It has also supported a water mill, fish farming, lodge development, adult education, bee keeping, and lead farmer training. The Mother's Group have received group formation and mobilisation training
<b>Rawsua [Langtang Valley]</b>	Langtang and Mundu villages	Construction	CAN built the secondary school in Langtang village and Lower Primary in nearby Mundu village. It also provided funds for repositioning the hydro-electric station.
		Education and Health	CAN is hoping to send in teacher support and help improve the health and general well-being of this impoverished area.
<b>Gorkha</b>	LiHi Gaun village	Construction	CAN has built the health post and timber is cut and the stone broken for a new primary school
		Education	CAN will supplement the government teacher.
		Health	CAN funds two nurses who also provide health education, a worming programme, first aid training to the Mother's Group and the existing school community
		Income generation	CAN has funded a telephone service based in the health post. Finance generated from this facility will provide a % of the profit towards the up keep of the Health Post. CAN has also provided a fruit cultivation programme and 'lead farmer' training

District	Community	Sector	Activity
<b>Lamjung</b>	Purano Duwar village	Construction	CAN built the school and sanitation block. It also put in a 12 kilometre water pipe to provide clean water
		Education	CAN financially supports two teachers, stationary, teaching materials and the supply of library books
		Health	Although CAN does not have a Health Post in Purano Duwar health staff do visit the community to provide health education and a worming programme. In 2005 a small general health camp was run for the community
		Income Generation	CAN Community Motivator has provided the training for fruit and bamboo production and kitchen garden development and 'lead farmer' training
	Karki Danda	Construction	Karki Danda School Sanitation Block. The school later in part collapsed through subsidence. CAN will in the near future help out with this problem.
<b>Kaski</b>	Ghyamrang village	Construction	CAN reroofed and extended the school and built a large sanitation block. CAN built the health post and put in extensive piping for clean water.
		Education	CAN supports the salaries of two teachers, provides school materials and also supports two nursery teachers.
		Health	CAN built the Health Post, funds the salaries for two nurses and a helper, provides all medicines and equipment/instruments. In 2006 CAN ran a Health Camp seeing approximately 1200 patients in three days. CAN continues to fund staff training and a school based health education programme
		Income Generation	CAN has financed the construction of six looms and Allo [nettle cloth] production training. This has also been supplemented by the community Mother's Group who have researched additional training opportunities and possible markets for the cloth. CAN also supports the development of the Mother's Group. Other areas of support provided by CAN include a kitchen garden programme, fruit cultivation, group formalisation and mobilisation programme, a water mill, black-smith, bee keeping support, 'lead farmer' training
<b>Kaski</b>	Rohi Gaun village	Construction	CAN provided a new school roof
		Education	CAN funds one teacher, the stationery and teaching material costs at the school and has funded maintenance work on the school
		Health	CAN nurses from Ghyamrang provide health education and a worming programme
<b>Gandaki</b>	Riban	Construction	Large sanitation block at Riban school
